Shahid Zaman

Full Stack Developer

Full Stack Developer passionate about building fast and scalable web applications, leading front-end teams to deliver exceptional user experiences.

WORK EXPERIENCE

Full Stack Developer
MaxRemind Inc
12/2023 - Present *Rawalpindi/Pakistan*

Full Stack Developer at MaxRemind — a healthcare solutions company specializing in medical billing and practice management services. I develop and manage full-stack web applications, also serving as Team Lead for the front-end team, and ensure timely delivery of high-quality solutions.

Technology
- React.js, Node.js, Express.js, .NET Core, JavaScript (ES6+), MUI, Bootstrap, HTML5, CSS3

Freelance Full Stack Projects
Self-Directed Learning & Practice Projects
01/2024 - Present

Developed full-stack web applications using React.js and Node.js (Express.js) with MongoDB, and backend services using .NET Core. Implemented JWT-based authentication, built RESTful APIs with CRUD operations, and designed responsive UIs using MUI and Bootstrap following best coding practices.

Technology
- React.js, Node.js, Express.js, .NET Core, MongoDB, JavaScript (ES6+), MUI, Bootstrap, HTML5, CSS3

PROJECTS

Management Information System (MIS) – Full Stack Developer (01/2026 - Present)
Designing and developing a company-wide Management Information System, building the frontend with ReactJS and MUI and the backend APIs using .NET Core. Company Setting, HR, Admin, and Credentialing modules have been completed; Billing Module and several other modules are currently in development.

Communication Center (MaxChat) – Project Lead (08/2024 - Present)
Project Lead & Web Developer. Led the development of MaxChat, a complete communication platform similar to Skype, built using ReactJS and SignalR for real-time messaging. As Project Lead, I managed the development of key modules including the Admin Panel, Chat Module, Call Module, Email Module, and Task Module. Real-time messaging was powered by SignalR, and high-quality audio/video calling features were implemented using Twilio. I was responsible for leading the team, designing the technical architecture, and ensuring the successful delivery of all core functionalities.

Union Health Center (UHS) (05/2024 - Present)
Designed the dashboard and developed charge management pages for the UHS Union Health Center using ReactJS, MUI, and React Redux.

MaxChart (Biller Website) (01/2024 - 05/2024)
Designed the dashboard and developed charge management pages (Add, Edit, and Details) for the MaxChart project using ReactJS, MUI, and React Redux.

Expense Tracker Website (ReactJs) (08/2023 - 11/2023)
https://github.com/MaharShahidZaman/Expense-Tracker/tree/master
Created an Expense Tracking website using ReactJS with Context API for efficient state management.

Gym Website (ReactJs) (03/2023 - 06/2023)
https://github.com/MaharShahidZaman/Gym-Project.
Developed a gym website using ReactJS with Context API for state management, incorporating engaging animations to enhance user interaction.

EDUCATION

Masters Of Computer Science
Ghazi University DG Khan
